

I am now enjoying an evening at home without interruption from annoying phone calls from people I don't want to talk to. If I want a newspaper I know how to get one. If I want a credit card I know how to apply for one. If I want books, magazines or any thing else I know how to get it. I don't need hear the phone ringing during dinner or after a long day at work (on the phone). Keep my phone from not ringing!
